Interoffice Correspondence

To: Potential Vendors

From: Wayne Riddle, Senior Buyer 

Subject: Request for Proposal #RFP2008-001-WR (Biodiesel Facility Development) Cancellation Notice

The subject RFP has been cancelled. Referencing Paragraph 1.19 of the "Instructions to Offerors" Section of the RFP package, the City of Albuquerque may cancel the Request for Proposals when it is in the best interest of the City.

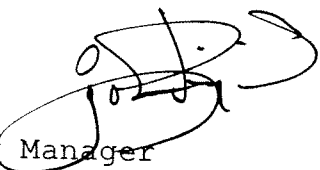

The voting members of the RFP AD HOC Committee recommended that the RFP be cancelled due to unresolved zoning issues. It was determined that the current M1 zoning classification is not adequate for a biodiesel facility and that a rezoning request to M2 needs to be filed.

The rezoning request would require that the City's Environmental Health Department (EHD) submit an application to the City's Planning Department to open the zoning on the closed Los Angeles Landfill to M2.

Additionally, the Environmental Health Department intends to rewrite the current biodiesel facility RFP requirements so as to include potential alternate sites that are currently zoned M2 and multiple biodiesel facility operations and designs.

The Environmental Health Department of the City of Albuquerque appreciates the efforts your company has put forth into this RFP, and invites you to participate in a future re release of this RFP.

Sincerely,

John Vigil
Purchasing Manager
City of Albuquerque
